# **TDR** Instruction Supplement Information

Wrong
Leads to close to each other
19′ is a false reading

Correct
Leads separated from each other
263′ is a correct reading

- Record blk-gnd and wht-gnd readings for VOP = 62, 63 and 64

- **VOP Setting**

  To see the VOP setting on the TS100, push the lower left button while pushing the power button on.

  The TS100 will toggle between the reading and the VOP setting.

  Tap the lower right button to step the VOP.
